Preventing the spread of COVID-19 and other HCAI's

Healthcare Associated Infections (HCAI's) do not have to be an inevitable consequence of healthcare. Recent evidence suggests that 10% to 70% *of HCAI's can be prevented using key interventions including preventing medical device related infections, improving hand hygiene and compliance with HIQA HCAI standards.

Our easy to use and engaging online course covers the required fundamentals of Infection Prevention & Control to help you combat the spread of COVID-19 and other HCAI's
